

1.

a)

$$\left| \frac{x \cdot \cos(x^2)}{1+x^2} \right| \leq \frac{|x|}{1+x^2}$$

$$\lim_{x \rightarrow \infty} \frac{|x|}{1+x^2} = 0 \quad \& \quad \text{squeeze 정리에 의해}$$

$$\lim_{x \rightarrow \infty} \frac{x \cdot \cos(x^2)}{1+x^2} = 0 //$$

b)

$$\tan^{-1} \left(\lim_{x \rightarrow 0^+} \frac{x \cdot \sin x}{\sin x - x} \right)$$

$$\stackrel{0/0}{=} \tan^{-1} \left(\lim_{x \rightarrow 0^+} \frac{\sin x + x \cos x}{\cos x - 1} \right)$$

$$\stackrel{0/0}{=} \tan^{-1} \left(\lim_{x \rightarrow 0^+} \frac{\cos x + \cos x - x \sin x}{-\sin x} \right) = \tan^{-1}(-\infty) = -\frac{\pi}{2} //$$

2.

$$\lim_{n \rightarrow \infty} \left[\frac{(n!)^n}{n!} \right]^{\frac{1}{n \ln n}} = \lim_{n \rightarrow \infty} e^{\frac{\ln \left[\frac{(n!)^n}{n!} \right]}{n \ln n}} = e^{\lim_{n \rightarrow \infty} \frac{\ln(n!) \cdot n - \ln(n!)}{n \ln n}}$$

$$= e^{\lim_{n \rightarrow \infty} \frac{\ln 2n + \ln(2n-1) + \dots + \ln(n+1)}{\ln n + \ln n + \dots + \ln n}} = e^1$$

$$\lim_{n \rightarrow \infty} \frac{\ln 2n}{\ln n} = \lim_{n \rightarrow \infty} \frac{\frac{2}{2n}}{\frac{1}{n}} = 1 //$$

3.

모든 $\varepsilon > 0$ 에 대해

$$0 < |x-2| < \delta \Rightarrow |x^3 - 3x + 1 - 3| < \varepsilon \quad \text{인 } \delta \text{ 을 찾자.}$$

$$\text{우선 } \delta = 1 \text{ 로 두면 } -1 < x-2 < 1 \Rightarrow 1 < x < 3,$$

$$|x^3 - 3x - 2| = |(x+1)^2(x-2)| \stackrel{x=3}{\leq} 16\delta$$

$$\text{이제 } \delta = \min \left(1, \frac{\varepsilon}{16} \right) \text{ 로 두면 증명 완료.}$$

4.

모든 $\varepsilon > 0$ 에 대해

$$0 < |x-2| < \delta \Rightarrow \left| \frac{1}{\sqrt{x}+\sqrt{2}} - \frac{1}{2\sqrt{2}} \right| < \varepsilon \quad \text{인 } \delta \text{ 을 찾자.}$$

$$\left| \frac{1}{\sqrt{x}+\sqrt{2}} - \frac{1}{2\sqrt{2}} \right| = \left| \frac{\sqrt{2}-\sqrt{x}}{2\sqrt{2}(\sqrt{x}+\sqrt{2})} \right| = \frac{1}{2\sqrt{2}} \left| \frac{\sqrt{x}-\sqrt{2}}{\sqrt{x}+\sqrt{2}} \right|$$

$$= \frac{1}{2\sqrt{2}} \left| \frac{x-2}{(\sqrt{x}+\sqrt{2})^2} \right| < \frac{1}{2\sqrt{2}} \cdot \frac{|x-2|}{(\sqrt{2})^2} < \frac{1}{4\sqrt{2}} \delta$$

$$\therefore \delta = 4\sqrt{2} \varepsilon //$$
